DESCRIPTION

Ursuit Cordura BZ is developed for demanding wreck and technical diving operations, which cannot be compromised by suit breakage. Cordura coated three-layer fabric provides the best possible abrasion and tear resistance, as well as high class durability. One of Cordura's essential guidelines is the Heavy Light –philosophy, which incorporates heavy performance underwater with lightness and ease above water.

In addition of durability and modifiable features, this is one of the most common reasons why so many defence forces around the world have chosen Cordura. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth.

The Flat Seam –structure enables a durable and flexible seam, which removes uneven layers within the seam. The seam is finished with a taping on both sides. The Cordura BZ has additional Cordura reinforcements on the crotch, bottom, elbows and knees. Roomy and easy accessible Tech-pockets, with integrated D-ring and bungee loops. A small pocket on the flap with zipper closure.
