DESCRIPTION

Ursuit Lite is made of very light and breathable four-layer material. The suit is easy to don, and it dries quickly. Ursuit Lite is perfect for warm water diving. Front zipper allows the user to don the suit without assistance. The cover flap on the dry zipper protects the zipper from sand and dirt, as well as prevents the jacket from rubbing against the zipper teeth. The zipper type is a YKK Aquaseal PU zipper, allowing maximal comfort and adaptivity. The suit has integrated suspenders, which together with the crotch strap enable a telescopic waist structure. These features combined with the Aquaseal zipper make the suit feel like a regular garment, and adapt to user's movements smoothly. The revised cut of the sleeves and shoulders enable excellent mobility. The crotch seam is renewed to prevent wear-and-tear and to provide even better abrasion resistance. The suit is equipped with a warm neck collar for added comfort in cold water dives. The warm neck is compatible with most separate hoods. The suit has Softdura reinforcements at the elbows, knees, shoulders and crotch for enhanced durability. The roomy and easy accessible thigh pockets are made of suit material.
